

**Highway Superintendent Report: 05/16/2017 \* Larry White**

We have been through all the roads patching and will again as time allows.

Two men spent several days on repairing and replacing road signs.

We drilled and blasted a small shot on Dana Hill road for drainage.

We cleaned out the storage building at the Pit.

We have built up the area for the ball field parking and rest of the rock barriers.

We have ditched sections of the White, Pestle and Fordham Hill roads.

We have removed a section of Pestle Street for drainage and correcting the base

We have replaced 1 pipe on Pestle Street, 2 on Fordham Hill, 1 on the White road and 1 on Lazy River road; we also installed approximately 150 feet of drainage tile on the Fordham Hill road above the Hatch road.

We have removed brush on a section of Dana Hill road and Fordham Hill road.

We have removed the pavement and added gravel for realignment on the Lazy River road.

We are scheduled to start shim on 5/16.

This has been a busy month and I thank the men.
