

## **Highway Superintendent Report: 06/20/2017 \* Larry White**

We have completed shim on all CHIP's projects and have assisted Dekalb with theirs.

We have drilled and blasted areas for drainage on Pestle Street, Fordham Hill and Silver Hill South.

We have completed our work on Lazy River road with highway realignment and this section will be paved while the county is here. We may be paving next week or it won't be until after our shutdown over the 4th.

We have cut shoulders on Silver Hill South, Curtis, Blackmer, Nolan, Stalker and Mackin roads and added gravel and chloride. We have completed grading and spraying all main gravel roads and are working on the seasonal roads now.

We have mowed road sides on all main roads and some seasonal roads.

This has been a busy month and I thank the men.
