

## **Highway Superintendent Report: 07/18/2017 \* Larry White**

We have completed our work on shoulder cutting, adding gravel and grading on the Donnerville and Colton roads

On June 30<sup>th</sup> we had 2 wash outs; one on the Hill road was repaired and the one on the Grandy road was repaired when the men returned to work July 10<sup>th</sup> after the shut down.

All of our paving projects have been completed, shoulders installed and all road signs for paving and equipment has been removed.

Projects #1 and 2 had approximately \$5,000.00 left and it was used on project #3 as approved. We will be applying for reimbursement after tonight's bills are paid.

We want to thank the county and paving crew for a great job as always

We have been given 5 boys for the summer youth program and they will also be available to Darryn as needed.

We replaced 1 road crossing pipe on the Lazy River road and repaved shoulder area at the White road intersection.

Even with our week shut down over the 4<sup>th</sup> this has been a productive month and I thank the men.
