

## **Highway Superintendent Report: 08/15/2017 \* Larry White**

We have replaced pipes on Lazy River, West, White, Fordham Hill, North Woods and Blanchard Hill and 2 on the Hill and Cassidy roads.

We have cut brush & weeds around all guide rails and bridge rails.

We have used the Excavator to cut brush on the Curtis & 2 sections of Silver Hill North as well as at our pit entrance for visibility. We followed up on the Curtis & Silver Hill with the chipper to clean up larger debris.

We have also removed brush on a section of the West & a section of Fordham Hill roads.

We removed approximately 100 ft of road on Fordham Hill & added a lift to improve the grade in prep for 2018 paving.

We have added gravel & graded the seasonal section of the Cook & Forbes & Burnell roads.

The heavy rains on 7/24 flooded several areas; 2 places the shoulders were washed out on the down side & the most damage was done on the Lazy River road where the wash outs went under the pavement; these sections have been cut out & removed & filled in with gravel. Soon we will be repaving these sections. Other areas had only minor wash outs

Rocky's last day was 7/31/17. He has been a great employee & a great asset to me as well. We wish him well in his retirement.

Tyler started on 8/1/17 and his experience with the county tells me he will be a good employee for us.

We have both wood sheds full & wood ready outside for winter; as well as more on hand.

This has been a bust month with good results & I thank the men for their efforts..
