

Highway Superintendent Report: 09/19/2017 * Larry White

We have completed road side mowing for the 2nd time and if time allows we plan to mow again as the leaves are gone to cut brush back.

We have installed the driveway extension for the school as agreed on last fall and have turned the check into Tess for the amount of \$2,078.74.

We set the poles at the ball field as requested.

We helped Edwards, Hermon & Dekalb with their paving.

We have cut brush & trees on the Stalker, Dana & Mackin roads and removed several stumps on the Dutton & Pyrites roads.

On the Mackin road we have cut the grade of the hill past residence 66 and added drainage. At the intersection with CR 17 we are widening the hill & resetting the grade to improve the approach from the south & try to reduce the amount of material that washes into the county road.

We have shimmed in the wash out sections on the Lazy River road and they may require more when fully compacted. We have also shimmed in sections on the Fordham Hill & Pyrites Russell roads.

On the Hewlett road where the beaver are working we removed the brush and added shot rock to the shoulder to stop them from digging under the road.

We have run the York Rake on Dutton, Silver Hill North & Cook roads & added chloride.

The summer youth program has ended & we thank them; Jordon Jeanette. Justin Fenlong, Christopher Ouellette, Jordon Moore & Ian Besaw; Ian's time has been extended through 9/29. They were a good bunch of young men with lots of energy.

I thank the men for a productive month.
