

Highway Superintendent Report: 10/17/2017 * Larry White

We have shimmed a few sections on Boyd Pond and Pyrites Russell roads and patched sections on the West and Lazy River roads.

We have completed shot rock removal and cutting the grade on the Mackin road intersection with CR 17.

We have cleared the spillway for a pipe on the Silver Hill road to increase the flow and worked to divert the water from a private road to stop it from running across our road.

We have purchased the gravel and added it to most gravel roads and re-sprayed with chloride.

We have stripped and cut down the top of our pit per MSHA recommendation.

We are working on mowing road sides back more as time allows.

We have completed our MSHA Annual refresher class.

We have started screening sand.

Due to the issues with the bridge we will be working with the County and Town of Hermon with snow removal.

This has been a busy month with good progress and I thank the men.
