

Highway Superintendent Report: 02/20/2018 * Larry White

Most of our time has been on snow & ice; on January 22nd during the freezing rain we had 3 trucks off the road. 1 was halfway down an embankment on the Hatch road. We want to thank the Reeds for their help with their excavator that was in the area. There was only minor damage to the truck; airline and spring shackle.

We had to replace the plow on the 2012 pickup. The old one was beyond repairs and the 2017 was at Blevins Ford for a water pump replacement under warranty.

I thank the men for their efforts.
