

Highway Superintendent Monthly Report

Highway Superintendent Report: 01/15/2019 * Larry White

Most of our time has been on snow removal with only minor issues for repair.

In colder weather the men have been working in the shop on building new storage locker for small items, new tire rack, mounted air hose reels in center of the bays, replaced exhaust fan in rest room, preventive maintenance on trucks and cleaning the shop.

The men have also built brackets to mount a wood splitter to the backhoe to deal with big blocks of wood.

All the men have worked well and I thank them.
