

Highway Superintendent Monthly Report

Highway Superintendent Report: 11/16/2021 * Larry White

A lot of our time has been on tree removal on the West, Pestle, Lazy River, Pyrites and Fordham Hill roads.

We have used the county stump grinder and removed stumps from this year's cuttings.

We have graded all gravel roads and will continue as needed until they freeze up.

We have repaired a catch basin on the Forbes Road and installed drainage tile at the intersection of Forbes and Backus roads.

We have shimmed sections of the Forbes Road and paved the intersections of Forbes and Backus roads and Dutton and CR 27.

The men have been using their vacation and hold over time that needs to be used up by the end of November.

I thank the man for a job well done.
