

Highway Superintendent Report: 01/18/2022: Richard Meilleur

We have spent the majority of our time plowing and sanding winter roads.

We had 1 truck down for 2 weeks and it is fixed and back in service now. As of today, all plow trucks are up and running.

I have ordered 75 tons of salt on January 11th as almost all our mixed salt and sand are gone.

We have cleaned up most of the downed trees from the 2 windstorms in December.

We have cut several large dead trees on the Belleville Road and cleaned up the debris.

I have trucking set up with Herb French to pick up the Athey Force Feed Loader we are buying. It should be here within the next week.

I am working on getting quotes on a new outdoor wood boiler. I have 2 quotes that average around \$21,000.00 installed. I will be looking at more options in the next month.

We have had a productive start to the year, and I would like to thank the men and Larry White for a smooth transition.
